

PRODUCT INFORMATION

TYPE 15 STEEL BAR + 3/4 SIDE BARS & STEPS HOLDEN 07+ RA RODEO

AVAILABLE MID MAY 2007

TJM has released the perfect combination for the 07+ RA Rodeo - the Type 15 Steel Bullbar with 3/4 Sidebars and Steps, both custom designed to suit this vehicle.

The Type 15 Bullbar has long been a popular choice for frontal protection with each bend and curve purposefully engineered to provide superior strength. While this product has been traditionally manufactured for commercial use, the list of features ensures that it is just as at home on the front of the top end model. TJMs T15 is so versatile that it can accommodate large driving lights and a TJM Ox 8,000lb, 9,000lb or 10,000lb winch. In addition it includes T-Slots for Recovery Jack placement, raised 63mm tube center section and polycarbonate indicator/park lights.

TJMs range of 3/4 Sidebars and Steps are all carefully engineered to be as strong as possible so that you can protect the sills, flares and wheel arches of your vehicle. Each set is sand blasted, zinc treated and polyester powder coated in black to make sure that they last the distance.
