

Product Information

TJM BATTERY FRAME HOLDEN RA7 RODEO DIESEL

AVAILABLE NOW

TJM has been making quality battery frames for many years and are now releasing the new Steel Super Alloy 5 Coated frame to suit the Holden RA7 Rodeo.

Constructed from 3mm thick steel sheet, all TJM frames are engineered to incorporate strategic folds that make the frames as strong as possible and able to withstand the toughest conditions. In addition to good structural strength, the SA5 coating used on each frame has been tested to withstand over 1000 hours of salt spray which ensures that corrosion shouldn't be much of a problem throughout the lifetime of the vehicle.

If you want a good quality battery frame that lasts the distance, you can't go past the TJM SA5 coated battery tray.

- Suits 8" Battery

DESCRIPTION:

Holden RA7 Rodeo SA5 Coated Battery Frame

NOTE: Fits Diesel Models Only
