TJM AIRTEC SNORKEL 07+ HOLDEN RA RODEO

AVAILABLE NOW

TJM has released the TJM Airtec Snorkel for the updated 07+ model RA Rodeo. This snorkel has been carefully designed to ensure that our customers do not have to sacrifice the overall look of the vehicle in order to have a snorkel.

All of TJM's snorkels are carefully designed to capture more than enough oxygen and remove moisture from the air before it enters the engine's intake. The shape and the positioning of the snorkel head guarantees that the correct volume of the cleanest air available is channelled to the engine, with excess moisture being drained out of the rear of the head of the snorkel.

Why it's important 4WD engines should enjoy the TJM Airtec advantage:

1. Fitting a TJM Airtec Snorkel means the air supply is drawn from roof level, providing cooler and cleaner air to the engine.
2. Because the air supply is drawn from roof level, dust is not as thick and plentiful as in the engine bay or inner guard.

This will help extend the life of the air cleaner element, therefore reducing wear of vital components.

3. With a correctly fitted TJM Airtec Snorkel well above water level, you can expect worry-free water crossings.
4. As the vehicle travels, the TJM Airtec Snorkel creates what's known as a ram air effect, that has often been found to increase engine performance.
