

## Product Information

### TYPE 15 ALLOY DELUXE TOYOTA 200 SERIES

AVAILABLE MARCH

The new Toyota 200 Series is in local dealerships now and hot on its heels is TJM's release of a real Alloy Bull Bar.

TJM has carefully engineered its new airbag compatible Type 15 Vehicle Protection Bar to fit in perfectly with the styling of this impressive 4WD without compromising on the strength that TJM's Alloy Bull Bars are renowned for. With over half the weight of the similarly styled steel bar, owners concerned about the weight of their vehicle and fuel economy can now purchase a well constructed product that will keep them safe in the event of an animal strike, all for less than the original equipment Bull Bar.

Other features of this product include:

- Headlight and grille mid-tubes to add to the protection of the front of the vehicle
- Polycarbonate Parker/Indicator lenses that resist stone chips and water
- Winch compatibility with steel winch frame coming standard with the bar
- Polyurethane Bumperettes that add to the styling and protect against minor bumps
- Large Spotlight accommodation on mid-tube
